Formatting an ASP Gridview & Detailsview using CSS

```
<!-- sample ASP Gridview using css for formatting -->

        <asp:GridView
            ID="GridView1"
            runat="server"
            AllowPaging="True"
            ...Sorting="True"
            ...enerateColumns="False"
            DataKeyNames="stID"
            DataSourceID="AccessDataSource1"
            PageSize="52"
            Gridlines="None"
            CssClass="cssgridview"
            AlternatingRowStyle-CssClass="alt"
            PagerStyle-CssClass="pgr"
        >
<!-- END -->
```

ASP Gridview Object

/* CSS to format a gridview -- START*/

`.cssgridview { width:100%; margin:5px 0 10px 0; border:solid 1px #525252; border-collapse:collapse; text-align:center; font-family: "Comic Sans MS"; color: #7C6F57; background-color: #F7F6F3}`

Formats the general Gridview (A)

`.cssgridview td { padding:10px; border:solid 1px #c1c1c1; color:#717171; }`

Formats the <td> tag inside the table, inside Gridview (B)

`.cssgridview td a, a:visited { color:#717171; text-decoration:none; }`

Formats the links <a> and visited links (a:visited) inside of the table data <td>

`.cssgridview th { padding:10px; color:#fff; background:#424242 url(./images/css/grd_head.png) repeat-x top; border-left:solid 1px #525252; font-size:0.9em; }`

Formats the table header <th> inside of Gridview (C)

`.cssgridview th a { color:silver; text-decoration:none; }`

Formats the links <a> inside of the table header <th> inside of Gridview (C)

`.cssgridview th a:hover { color:white; background-color:#7C6F57; text-decoration:underline; }`

Formats the behavior when you hover over links (a:hover) inside of the table header <th> inside of Gridview (C)

```
.cssgridview .alt { background: #fcfcfc url(./images/css/grd_alt.png) repeat-x top;}
```

Formats the alternating rows inside of Gridview

```
.cssgridview .pgr { background: #424242 url(./css/grd_pgr.png) repeat-x top; }
```

Formats the pager row across the bottom of Gridview that lets you view the next group of records

```
.cssgridview .pgr table { margin: 5px 0; }
```

Pager row is shown as a table, this formats the <table> that displays the page numbers.

```
.cssgridview .pgr td { border-width: 0; padding: 0 6px; border-left: solid 1px #666;
font-weight: bold; color: #fff; line-height: 12px; }
```

Format the table data <td> in the pager table <table> that displays the page numbers.

```
.cssgridview .pgr a { color: #666; text-decoration: none; }
```

Format the links <a> in the pager table (the page numbers you click on).

```
.cssgridview .pgr a:hover { color: #000; text-decoration: underline; }
```

Format the behavior when you hover (a:hover) over the page numbers in the pager table.

```
/* CSS to format a gridview -- END*/
```

```
<!-- sample ASP Detailsview using css for formatting -->

        <asp:DetailsView
            ID="DetailsView1"
            runat="server"
            AutoGenerateRows="False"
            DataKeyNames="stID"
            DataSourceID="AccessDataSource1"

            HeaderText="State Details"
            CssClass="cssdetailsview"
            HeaderStyle-CssClass="header"
            FieldHeaderStyle-CssClass="fieldheader"

            ItemStyle-CssClass="item"
            AlternatingRowStyle-CssClass="altrow"
            CommandRowStyle-CssClass="command"
            PagerStyle-CssClass="pager"
        >

<!-- END -->

/* CSS to format a detailsview --START */

.cssdetailsview { font-family: "Comic Sans MS"; background-color:#fff; margin:5px 0
10px 0; border:solid 1px #525252;                                    border-
collapse:collapse; text-
align:center; }
```

Formats the general Detailsview (A)

```
.cssdetailsview td { padding:10px; border:solid 1px #c1c1c1; color:#717171; text-
align:left;}
```

Formats the <td> tag inside the table, inside Detailsview (B)

```
.cssdetailsview .header td { text-align:center; padding:4px 2px; color:silver;
background:#424242 url(./css/grd_head.png) repeat-x top; border-left:solid 1px
#525252; }
```

Formats the header text in Detailsview (C)

```
.cssdetailsview .fieldheader { color:red; width:150px; text-align:right;}
```

Formats the database field text in Detailsview (D)

```
.cssdetailsview .altrow { background: #fcfcfc url(./css/grd_alt.png) repeat-x top; }
```

Formats the alternating rows inside of Detailsview (E)

```
.cssdetailsview .item {}
```

```
.cssdetailsview .command {  background: #424242 url(./css/grd_pgr.png) repeat-x top;
line-height: 20px;}
```

```
.cssdetailsview .command td { text-align:center;}
```

```
.cssdetailsview .command a {color:Silver; text-decoration:none; padding:10px; }
```

```
.cssdetailsview .command a:hover {color:Silver; text-decoration:underline; }
```

```
.cssdetailsview .pager {}
```

```
/* CSS to format a detailsview --END */
```
